SynthNet-C: Stability Study (Test Paper 3)

SYNTHETIC TEST PAPER - hypothetical values created for testing ANVIKSHA. Not real experimental findings.

Results

Over 10 independent runs, SynthNet-C attains 85.2 +/- 1.1 accuracy (mean +/- standard deviation, n = 10), versus 84.1 +/- 1.3 for the baseline (n = 10). The difference is statistically significant ($p < 0.05$, Welch's t-test).

The 95% confidence interval for the SynthNet-C mean accuracy is [84.4, 86.0].
